* Wauza nyama buchani wahadharishwa *

Na Sifa Lubasi

OFISA Masoko wa Jiji la Dodoma, James Yuna amewataka wafanyabishara wa machinjio ya kuku na wauza nyama kwenye mabucha, kufanya kazi zao kwa umakini ili kuzuia mlipuko wa magonjwa.

Yuna alisema hayo juzi wakati akizungumza na wafanyabiashara hao kutokana na ukaguzi alioufanya kwenye machinjio ya kuku na mabucha ya kuuzia nyama yaliyopo katika masoko ya jiji hilo.

Aliwataka kuhakikisha machinjio hayo yanakuwa katika mazingira safi kwa muda wote.

Alisema baadhi ya machinjio ya kuku na mabucha, yana mazingira ambayo siyo rafiki katika suala la usafi, hivyo ni muhimu wakajihadhari na milipuko ya magonjwa yanayoweza kujitokeza kutokana na suala hilo.

"Mjihadhari na magonjwa yanayoweza kujitokeza kutokana na mazingira mnayofanyia biashara zenu, hapa tatizo likitokea siyo nyinyi tu bali hata kwa wateja wenu pia wanaweza kujikuta wakikumbwa na ugonjwa," alisema.

Alisema bado kuna changamoto kwa baadhi ya wafanyabiashara ndogo, kutozingatia usafi kwenye maeneo wanayofanyia biashara zao, hali ambayo imekuwa ikisababisha kuwepo kwa takataka na harufu kali ya uchafu.

Ofisa huyo wa masoko aliwataka wafanyabishara ndogo maarufu wamachinga, kufuata kanuni na sheria zinazoelekezwa na jiji kwa kutofanya biashara kwenye maeneo yasiyo rasmi, yanayohatarisha maisha na bidhaa zao..

Akizungumza na wafanyabishara kwenye masoko yaliyovamiwa na wamachinga, aliwataka kutofanya shughuli katika sehemu ambayo siyo rafiki kwa upande wao.

Alisema bado kuna changamoto kwa baadhi ya wamachinga kupanga bidhaa zao maeneo yasiyo rafiki kwao na kwa wateja wao na kusababisha adhaa kubwa inayoweza kujitokeza.

"Wengi hukimbilia kupanga bidhaa kandokando ya barabara maeneo ambayo hutumika kupita magari na pikipiki, hali hii inaweza kusababisha ajali na pia uharibifu wa bidhaa zao na hata kwa maisha yao ikiwemo na wateja wanaonunua bidhaa hizo," alisema.

Alisema jiji hilo halitakuwa tayari kuwaona baadhi ya wamachinga, wakikiuka maelekezo yaliyotolewa ya ufanyaji biashara.

Alisema jiji hilo litaendelea kutoa elimu, ili sheria na utaratibu uweze kuzingatiwa na kuheshimiwa kwa pande zote mbili.

Aliwataka wafanyabiashara hao kushirikiana na halmashauri ya jiji pale wanapogudua kuna baadhi yao wamekiuka maelekezo kutoka ngazi husika, kama vile kuvamia maeneo yaliyotengwa kwa ajili ya shughuli za kiserikali na kuweka vibanda vya biashara.

Kiwanda cha Ngozi Karanga kuingiza bil 80/- kwa mwaka

Na Nakajumo James, Moshi

MRADI wa kiwanda cha bidhaa cha ngozi cha kimataifa cha Karanga, unatarajia kuingiza mapato Euro milioni 29.9 (zaidi ya Sh bilioni 79.7 kwa mwaka).

Aidha, zaidi ya wafanyakazi 7.000 wakiwemo wa kudumu 3,000 na ajira za muda maalumu 4,000 watanufaika kutokana na shughuli za uzalishaji kwenye mnyororo wa thamani.

Meneja wa kiwanda hicho, Omary Masoud alieleza hayo kwa timu ya makatibu wakuu wa wizara nne, ambazo kwa namna moja au nyingine zinanufaika moja kwa moja na kuanza na uendeshaji kiwanda hicho.

Makatibu wakuu hao ni wa Ofisi ya Waziri Mkuu (Sera, Bunge, Kazi, Ajira na Wenye Ulemavu), Andrew Massawe, Katibu Mkuu Mifugo na Uvuvi (Sekta ya Uvuvi), Profesa Elisante Ole Gabriel, Katibu Mkuu wa Viwanda na Biashara, Profesa Riziki Shemdoe na Katibu Mkuu Mambo ya Ndani ya Nchi, Christopher Kadio na Mkurugenzi Mkuu wa Mfuko wa Hifadhi ya Jamii kwa Watumishi wa Umma (PSSSF), Hosea Kashimba.

Masoud alisema kiwanda kitazalisha jozi 4,000 za viatu kwa siku sawa na jozi milioni 1.2 kwa mwaka, jozi za soli za viatu 800,000 mpaka milioni 1.2 kwa mwaka, kuchakata ngozi futi za mraba milioni 13 kwa mwaka na kwamba asilimia 60 zitatumika kiwandani na asilimia 40 soko la ndani na nje ya nchi.

"Pamoja na bidhaa hizo, pia tutatengeneza mikoba ya wanawake na wanaume, mikanda, makoti ya aina zote, mifuko ya makochi ya magari, mifuko ya kubebea silaha, mipira ya michezo ya aina mbalimbali na bidhaa nyingine za ngozi," alisema meneja huyo.

Makatibu wakuu walishiriki usimamizi wa ufungaji wa mitambo ya kisasa kwenye kiwanda hicho, kinachojengwa kwa gharama ya zaidi ya Sh bilioni 136. Kinatarajiwa kuanza kazi rasmi Oktoba mwaka huu.

Naibu Katibu Mkuu Wizara ya Viwanda na Biashara, Ludovicky Nduhiye alisema kuna haja ya serikali kutumia fedha za mfuko wa ngozi ili kuboresha mazao yatakoanayo na mifugo.

Mradi huo unaendeshwa kwa ubia kati ya PSSSF na Jeshi la Magereza, kwa usimamizi wa kampuni tanzu ya Karanga Leather Industries (KLICL).

Wachinjaji, wenye bucha watakiwa kuzingatia usafi

Na Peter Mkwavila,
DODOMA

WAFANYABIASHARA wa machinjio ya kuku na wamiliki wa bucha za nyama katika Jiji la Dodoma, wametakiwa kuzingatia usafi ili kujiepusha na magonjwa ya mlipuko.

Ofisa Masoko wa Jiji hilo, James Yuna, aliyasema hayo jana alipokuwa akizungumza na wafanyabiashara hao baada ya kukagua hali ya machinjio na bucha kwenye masoko mbalimbali ya Jiji la Dodoma.

Alisema kanuni za afya zinapaswa kuzingatiwa kwenye maeneo hayo kwa kuhakikisha yanakuwa safi muda wote.

"Baadhi ya machinjio ya kuku na bucha mazingira yake si rafiki hususan katika suala zima la usafi, hivyo ni muhimu mkachukua tahadhari zote ili kutokumbwa na magonjwa ya mlipuko," alisema.

Yuna pia alisema bado kuna tatizo kwa baadhi ya wafanyabiashara wadogo kutozingatia usafi kwenye maeneo ambayo wanafanyia biashara zao na kusababisha taka kusambaa ovyo.

Aliwataka wafanyabiashara hao kufuata kanuni na sheria za Jiji kwa kutofanya biashara kwenye maeneo yasiyo rasmi.

"Kuna tatizo wamachinga wamekuwa wakipanga bidhaa zao kwenye maeneo yasiyo rafiki wengi wanakimbilia kupanga bidhaa kando kando ya barabara ambayo inatumika kupita magari na pikipiki, hii inaweza kusababisha ajali pia na uharibifu wa bidhaa zao na hata kwa maisha yao," alisema.

Aliongeza: "Pamoja na kuwa na vitambulisho siyo sababu ya kukaidi maelekezo ambayo yapo kwa faida yenu, kinachotakiwa hapa ni kuheshimu na kuepukana na tabia ya kupanga bidhaa kwenye maeneo hatari."

Alisema kuwa Jiji halitakuwa tayari kuwaona baadhi ya wafanyabiashara wanakiuka maelekezo yaliyotolewa katika kufanya biashara.

UVUVI

Wadai kanuni mpya za uvuvi zimekimbiza wavuvi baharini

Na CHRISTINA GAULUHANGA -DAR ES SALAAM

MWENYEKITI wa Soko la Kimataifa la Samaki Feri, Mbaraka Kilima, amesema uhaba wa samaki ambao umefanya kupanda bei ya bidhaa hiyo, unatokana na mabadiliko ya kanuni za uvuvi.

Akizungumza na MTANZANIA Dar es Salaam jana, Kilima alisema mabadiliko ya kanuni hizo yamesababisha baadhi ya wavuvi kushindwa kuingia baharini kuvua zaidi ya mwezi sasa.

Alisema hali hiyo imesababisha ndoo moja ya samaki kuuzwa Sh 120,000 na kuendelea tofauti na kipindi cha nyuma.

Kilima aliongeza kuwa kipindi cha nyuma samaki walikuwa wakiuzwa ndoo ndogo Sh 30,000 hadi 40,000 huku wakubwa wakiuzwa Sh 50,000 hadi 70,000 bei ambayo wafanyabiashara wengi waliweza kumudu tofauti na hivi sasa ambapo wengi wanakosa biashara na wateja pia wakiadimika.

"Mabadiliko ya kanuni za uvuvi ambayo yameainisha aina ya nyavu yamesababisha wavuvi wengi kusitisha shughuli hiyo, hali iliyofanya bei ya samaki kuwa juu na wavuvi wengi kukabiliwa na hali ngumu ya maisha," alisema Kilima.

Alisema hata hivyo uongozi wa soko hilo unaendelea na mikakati kadhaa kuhakikisha wavuvi wanarejea baharini na bidhaa hiyo kuendelea kupatikana kwa wingi.

Kilima alisema pia wanaendelea kufanya maboresho ya miundombinu ya soko hilo ili kuondoa changamoto ndogo ndogo zilizopo hivi sasa.

Pia alisema wanaendelea kufanya uhakiki wa wafanyabiashara wa soko hilo ili kufahamu kama huduma zilizopo sasa wananufaika nazo.

Kwa upande wake, mfanyabiashara Sadick Jumanne aliiomba Serikali ikutane na wavuvi hao ili waweze kuelezea changamoto wanazokabiliana nazo hivi sasa.

UCHAGUZI MKUU 20

Mgombea ubunge awaombea wafugaji mbegu za ng'ombe

Na SAFINA SARWATT
-MOSHI

MGOMBEA ubunge wa Viti Maalumu kupitia CCM, Shally Mushi amemwomba Waziri Mkuu Kassim Majaliwa endapo wananchi wa Moshi Vijijini watampa kura katika Uchaguzi Mkuu wa Oktoba, awasaidie kupata mbegu mpya na bora za mitamba ya ng'ombe wa maziwa ili waweze kujiinua kiuchumi.

Shally pia alimwomba Majaliwa kupitia serikali kuwasaidia wananchi kupata mbugu bora za mbuzi wa maziwa na kuku wa kisasa ili kuwawezesha kufuga kisasa kwa lengo la kupambana na umasikini.

Mgombea huyo aliyasema hayo jana, katika mkutano wa hadhara wa uzinduzi wa kampeni za kumnadi mgombea ubunge wa jimbo la Moshi Vijijini, Profesa Patrick Ndakidemi uliofanyikia katika viwanja vya Kibosho Kirima.

Alisema wananchi wa Moshi Vijijini ni wakulima na wafugaji wazuri hivyo wana kila sababu ya kupatiwa mbegu mpya za mitamba ya ng'ombe na mbuzi wa maziwa kukuwa kisasa ili waweze kujiendeleza na kuachana na umasikini.

"Huku kuna akina mama wengi wafugaji wazuri wakiwezeshwa wanaweza kubadilisha maisha ya familia zao kwa kuuza maziwa kuku wa nyama na mayai endapo watawezeshwa," alisema.

Akizungumzia ujenzi wa kiwanda cha viatu na bidhaa zitokanazo na ngozi cha Magereza kilichopo mjini Moshi, alisema kiwanda hicho kikikamilika serikali haina budi kuweka mazingira ya kitoa ajira hamsini hamsini kwa wanawake na wanaume kwani kiwanda hicho kikikamilika kinaweza kutoa ajira zaidi 3000.

Alisema kama ilivyo kwa shirika la reli aliweza kuishawishi na kutoa nafasi kwa wanawake kupata tenda ya kupika vyakula n'a kuiza vinywaji ili waweze kujikwamua kiuchumi.

Naye mgombea ubunge wa Moshi Vijijini, Professa Patrick Ndakidemi aliwaomba wananchi wa jimbo hilo kumchagua kuwa mbunge wao hilo ili aweze kutumia taaluma yake ya kilimo kwa kushirikiana na wadau mali mbali kuleta maendeleo ya wananchi.

NARCO allocates over 200m/- for new ranch

THE National Ranching Company Limited (NARCO) says it has set aside more than 200m/- that would go towards establishing a new ranch in Muleba District, Kagera Region.

Making the revelation here yesterday, NARCO acting Director General, Masele Shilagi further said the ranch with 67- hectares would be named as 'Mwisa II' and grouped into at least 89 blocks of different sizes.

In an interview with the 'Daily News', he noted that the arrangement would bring to 16 the number of ranches owned by the state -owned company.

He further said the establishment is part of NARCO's strategies to improve performance of the livestock sector in the country, and as well limit frequent conflicts between livestock keepers and farmers competing for confined land space for their individual activities.

As part of preliminary stages, Mr Shilagi said that NARCO had already spent at least 140m/- to develop the new envisioned area, which includes surveying the said 89 blocks.

"We have freely distributed at least 1,000 plots to residents, who have been residing inside the ranching areas," he added.

The Director General equally noted that the establishment of the major facility was an important step for them to invest largely and professionally in local areas.

According to Mr Shilagi, NARCO had so far developed a crucial roadmap for the implementation of the strategic programme that would overhaul and improve the livestock keeping industry in the country for Tanzania to ensure the sector plays a vital role in fast-tracking a pace of industrialization drive in the country.

"The livestock sector is crucial in fast -tracking the country's industrial economy, and thus, we are well prepared to ensure farmers are keeping their livestock in more professional and suitable areas," he said.

Expounding further on the plans, the Acting Director General said plans were also afoot to start training livestock keepers on best animal breeds, and as well impart to them key knowledge on how best to keep their livestock more professional.

"We're also planning to train our staff so that they can cope with modern livestock keeping technologies, and we are planning also to recruit more staff to facilitate the company's delivering ability," he expressed.

Recently, the company implemented a useful exercise of demarcating and fencing all its ranching blocks. According to him, the exercise was targeting to curb illegal invasion to ranching areas.

In his remarks during the climax of this year's Nanenane exhibitions, Prime Minister Kassim Majaliwa said the fifth phase government, through NARCO, would set aside enough grazing areas in all districts within the country.

At least two potential investors from Egypt and Namibia have already lodged applications to invest into meat processing industries.

A total of 120 giant and 2[illegible] small scale investors are currently with diverse contracts with the state- owned company in different regions in Tanzania.

Long waited Dodoma - Iringa road construction finally begins

MPWAPWA residents may now have a reason to smile after the government's decision to start the implementation of a project for the construction of a road that connects the district to Dodoma, Iringa and Morogoro begins.

The road that would be upgraded to tarmac level follows a pledge by President John Magufuli, who once said he wants to see Mpwapwa residents improving their income through the road presence.

Speaking during a two- day working tour Dodoma Regional Commissioner (RC), Dr Binilith Mahenge, Mpwapwa District Commissioner, Jabir Shekimweri said that the promise made by Dr Magufuli had started paying off.

The RC was on his working tour to inspect different community development projects, including the 5km road in the centre of Mpwapwa promised by Dr Magufuli and that already, Tanzania Rural and Urban Road Agency (TARURA) has completed its 3km stretch.

However, he noted that the government has equally implemented the promise to construct the Mpwapwa-Kongwa road to tarmac, whose 2km out of 5 stretch has already been constructed by the Tanzania Roads Agency (TANROADS) at 4.9bn/-.

According to the DC, also, Mpwapwa residents would equally enjoy travelling on the 75-kilometre Mpwapwa-Kibakwe road after the completion of a feasibility study, besides the Iringa and Dodoma regions.

On the projects, Mpwapwa District TARURA Manager, said 3 kms of the roads that had been promised by Dr Magufuli had been completed and that the project was still active.

Reached for a comment, Mpwapwa Districts TANROADS Manager, Salome Kabunda said already 2 kms out of 5 of the Mpwapwa- Kongwa road had been com-

Institute researches, identifies new sunflower seeds for cultivation

THE Tanzania Agriculture Research Institute (TARI-Ilonga centre) has researched and identified three new sunflower hybrid seed varieties scheduled for release to potential users by October this year.

According to National Coordinator for Sunflower Research, Dr Frank Reuben, the new development is aimed at improving production and production of the crop that is currently cultivated in all regions within the country except Dar es Salaam.

According to the Global Agriculture and Food Security Programme (GAFSP) in 2016, sunflower is the most likely subsector to yield investable opportunities in Tanzania.

That is making the country set to reap several economic fortunes from its cultivation, but because of absence of enough hybrid seed varieties as in most places, farmers are reportedly still using recycled seeds slowing their progress.

Commenting further, Dr Reuben noted there are possible factors, which are likely to propel and increase production of sunflower in the future citing them potential and superior agronomic characteristics of sunflower.

Dr Reuben further noted that there was a need for alternative crop(s) in some areas of the country to increase and keep pace with demand for edible oils.

Equally, the Coordinator detailed that TARI-ILO 2019 and TARI-NA 2019-new seeds have high yield of grains and oil, resistant to pests and diseases and are also tolerant to drought conditions.

"These are appropriate seed varieties for small scale and large scale farmers. The reason is that these seeds allow farmers to produce and hence, we distribute them in Quality Declared Seed (QDS) per class within their farming community under the Tanzania Official Seed Certification Institute (TOSCI) supervision," Dr Reuben said.

Expounding, he said the institute was now working round the clock to ensure the varieties become known, accessible and used professionally by end users.

However, he informed that the potential for expansion of sunflower in Tanzania was [illegible] and that there was enough land for growing the crop, adding that its cultivation in the country may also have potential for long term expansion.
